CHARLES LWANDA

Learning Experience Designer | Performance Consultant
Nairobi, Kenya | chaslwanda@gmail.com | (+254) 720 678 680 | **charleslwanda.com**

PROFESSIONAL SUMMARY

- Learning experience as a designer and performance consultant with 10 years across teaching and instructional design. I find the root cause of a performance gap first, then decide whether training is the right fix.
- Build scenario-based simulations in Articulate Storyline 360 using cognitive load management, retrieval practice and scenario fidelity, and evaluate them with the Kirkpatrick model rather than completion rates.
- Deliver SCORM-compliant courses and blended programs for low-bandwidth, mobile-first learners across Kenya and East Africa, for banking, fintech and international development clients.
- Cover the full cycle: client intake, needs analysis, design, build, LMS deployment and impact evaluation.

CORE EXPERTISE

- Performance consulting, root-cause analysis and needs assessment
- Action mapping (Cathy Moore) and competency-based training design (CBET)
- Scenario-based and branching simulation design
- Learning science: spaced retrieval, cognitive load management, scenario fidelity
- Articulate Storyline 360: variables, triggers, branching logic and scoring
- SCORM and xAPI packaging; LMS administration (Moodle, Learn Dash, Tutor LMS)
- Kirkpatrick evaluation and training impact analysis
- Low-bandwidth, mobile-first design and Universal Design for Learning
- Training of Trainers design, capacity building and facilitation

PROFESSIONAL EXPERIENCE

Learning Experience Designer & Capacity Building Lead **2025 – 2026**
MATTERS CBE, Training of Trainers Program (International Development) | Kenya, Remote and Field

- Closed the gap between what trainers knew and what they did in the field, measured by a readiness assessment mapped to every module, by building a multi-module Training of Trainers program around observable facilitation tasks.
- Made undocumented field expertise reusable, measured by a set of replicable case studies and facilitation toolkits written for mixed literacy levels, by interviewing practitioners and converting their methods into step-by-step models.
- Kept training usable where connectivity is poor, measured by every module being built for mobile-first, low-bandwidth delivery in short sessions, by cutting heavy media and restructuring content.
- Reduced cognitive load for trainers new to the methodology, measured by retrieval prompts built into each module, by chunking content and spacing practice between sessions.
- Tracked whether training changed trainer practice, measured by a Kirkpatrick-based framework covering trainer readiness and downstream learner impact, so content could be revised between cohorts.
- Sustained engagement after the training ended, measured by communities of practice and peer exchange structures running across trainer cohorts, by setting up learner participation systems.

Independent Learning Experience Designer & Performance Consultant **2019 – Present**
charleslwanda.com | Corporate and NGO clients, Nairobi, Kenya

- Kept clients from defaulting to a course when training was not the problem, measured by a documented needs analysis before every build, by running structured intake with banking, fintech and professional services stakeholders.
- Built “The Conversation You’ve Been Avoiding,” a branching manager performance simulation in Storyline 360, to give managers safe practice at a conversation they tend to avoid, measured by two outcome paths tied to specific, observable manager behaviors, by using consequence networks and gamification mechanics.
- Produced two full Storyline 360 production blueprints for Kenyan banking ethics training (“Inside the Vault” and “The Weight of the Badge”), measured by every decision point mapped to an on-the-job behavior, by applying action mapping, scoring logic and SCORM architecture.
- Built a financial literacy course for a South African microfinance institution, measured by content tied to the borrower decisions that drive repayment problems, by designing practice scenarios around those decisions.

- Delivered SCORM courses ready for LMS deployment, measured by tested launch, completion and score reporting, by packaging and testing builds in Moodle, Learn Dash and Tutor LMS.
- Launched facilitation toolkits, storyboard templates and instructional design frameworks on Payhip for corporate L&D professionals, measured by products live and for sale, by designing, packaging and publishing them independently.

SELECTED PORTFOLIO

- **MATTERS CBE Training of Trainers:** multi-module curriculum for East African field practitioners, using blended delivery and action mapping.
- **Banking Ethics Series ("Inside the Vault" and "The Weight of the Badge"):** Storyline 360 production blueprints with gamification and SCORM architecture.
- **Manager Performance Simulation ("The Conversation You've Been Avoiding"):** branching Storyline 360 scenario with consequence networks.
- Live demos and case studies: charleslwanda.com

EDUCATION

- **Masters in Learning Design and Technology (MLDT) (in progress),** Open University of Kenya.
  Learning science, learning analytics and UX applied to digital learning design.
- **Bachelor's Degree in Education,** Moi University, Kenya, 2010 – 2015. Instructional strategy, assessment design and learner-centered design.

TOOLS AND TECHNOLOGIES

- **Authoring and standards:** Articulate Storyline 360, SCORM, xAPI, UDL frameworks
- **LMS:** Moodle, Learn Dash, Tutor LMS
- **Technical:** HTML/CSS/JS, React, GitHub, Cloudflare Pages, AI tools (Claude, Open Ai)
- **Design and media:** Canva, Adobe Creative Suite, Camtasia, Moho (2D)
